The Times-Picayune: What new $5B investment means for nation's first floating LNG terminal off Louisiana coast

June 6, 2026

Eric Smith, professor of practice and associate director of the Tulane Energy Institute , was interviewed by The Times-Picayune | Nola.com for a story about Delfin Midstream's plans to build the nation's first floating LNG terminal off the Louisiana coast.

> "U.S. LNG production is the biggest in the world right now — particularly with our friends in Qatar shut in," said Eric Smith, associate director of the Energy Institute at Tulane University. "Arguably, Louisiana has more LNG export capability than anywhere else on earth."
